

Matterport Scan Walk Around Instructions

To navigate a Matterport space with a mouse, click and drag to look around, use the scroll wheel to zoom in and out, and click on the semi-transparent white circles on the floor to move to new viewpoints. You can also use the keyboard's left and right arrows to rotate your view and the up and down arrows to move forward and backward.

Mouse Controls

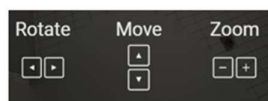

Look Around: Click and hold the left mouse button and drag your mouse in any direction to change your view.

Zoom: Use the mouse scroll wheel to zoom in and out of the space.

Move: Click on the semi-transparent white circles on the floor to instantly move to that specific location.

Move to a Spot: Click on a white circle to move the camera to that position.

Keyboard Controls

Rotate View: Use the left and right arrow keys to rotate your perspective.

Move Forward/Backward: Press the up and down arrow keys to move through the space.

Additional Navigation Features

Doll House View

Switch to this view to see the entire property in 3D and click on a floor plan to jump to that spot.

Floor Plan View

Select this view to see a 2D map of the space and navigate by clicking on different areas to zoom back into walk through mode.

Floor Selector

This feature allows you to switch between floors instantly

Measurements

Measurements in Matterport let you measure the dimensions of objects and rooms. You can take measurements and share them with visitors.

Defurnish Space

Matterport's AI-powered defurnish tool makes it easy to remove furniture from your Matterport Spaces.

The tool works by identifying and masking the furniture in your scans using advanced image recognition techniques. It then intelligently fills in the empty spaces where the furniture used to be, restoring background walls and floors to create an unobstructed view of the room. This allows for a clearer visualization of the space, making it easier to reimagine and redesign.

Highlight Reel

This bottom-left feature allows you to click on highlighted spots to go directly to them or click "Play" to watch a guided tour.

Tags

Click on coloured double-circles to access information, images, videos, or links associated with that point in the space.

Search

Gives you the opportunity to search for tags, highlights, rooms etc

Virtual Reality

By clicking the VR button in the bottom-right. If your device supports WebXR and has a controller, you should see a button that says **Enter VR**.

Share

Ability to share the link via email or text.

Full Screen

To see scan in full screen mode, better for presentations, meetings etc.
