Thanks for the reminder on friday.

As per our discussion and thanks again for the additional images sent through. I believe this highlights that this overlay should be remove from my property.
There is no substantial risk to my property as that fence lines sites above the flood depth indicated.

I don't have time/money to source any independant mapping.
Attaching another photo to add to the initial ones, I leveled out the space to the fence to make a temporary cricket net and that fence line is built up with sleepers /dirt.

Can I please consider this a formal submission to take the overlay off the my property.
Please let me know if I need to supply anything else.

Regards
[REDACTED]

Hi [REDACTED]

Please find maps of the flood depth and extents for the year 2100 and the proposed overlay.

Let me know if you want your email considered as a submission.

Kind regards

Strategic Planning

Hi [REDACTED]

Thank you for your email and for providing the screenshot and additional context about your property at [REDACTED].

If you are comfortable with it, we can treat your email as a formal submission to the exhibition of Planning Scheme Amendment C217ball. This will ensure your concerns are formally considered as part of the amendment process.

If you would like to add any further information to support your submission, it may be helpful to include (where available):

- any survey or level information showing ground or finished levels at the rear of the property,
- photos that demonstrate the existing land levels or works you've undertaken, and
- a brief summary of the outcome you are seeking (for example, amendment of the mapped flood extent affecting your property).

That said, providing additional information is optional — your current email and screenshot are sufficient to be recorded as a submission if you prefer not to add anything further.

Please let us know how you would like to proceed, or if you have any questions about the submission process.

Kind regards,

Strategic Planning

Hi Strategic Planning.

I live at [REDACTED]

This flood map touches the rear fence of my property.

I don't believe this is an accurate map of the back of my property.

The rear fence I have leveled out the gap between the rear shed and the fence. With the rear of the block built up and sitting 0.45M above the property that borders the fence marked in attached screenshot.

Would be looking to oppose the motion and have my property amended to be taken out of the flood zone.

Attached is a screenshot mentioned.

Thank you for your time please advise if needing anything further.

Kind Regards
