

Trails and Connections Project – Whitelaw Avenue

Shared Path Alignment OCT 2025

LEGEND

Proposed shared path

Proposed shared user path raised crossing

Plan for integration with future shared path network:
With a future shared path planned to run through the area, now is an ideal time to rethink site layout and access to ensure the safety of pedestrians and cyclists. This includes improving visibility, managing vehicle movements, shared user path raised crossing and separating active transport routes from general traffic to create a safer, more connected open space network.
